Flag question

Consider the system given by the augmented matrix.

$$\left[\begin{array}{ccc|c} 1 & 2 & -1 & 4 \\ 0 & 0 & k^2-2k-3 & k-3 \\ 0 & -1 & 1 & 3 \end{array}\right]$$

Determine for which value(s) of k will the system have infinitely many solutions?

- (●) $k = 3$
- ( ) None of the given options
- ( ) $k = -3 \text{ and } k = -1$
- ( ) $k = -1$
- ( ) $k = -3 \text{ or } k = -1$
- ( ) $k = 3 \text{ and } k = -1$
